

NayaHR

AI-native HRIS · built for Indian businesses

One platform for your whole people operation

Hiring, performance, pay, and time off — in one place, with an AI assistant that actually gets work done.

nayahr.in

Running HR shouldn't mean juggling ten tools

Today, for most SMBs

- Payroll in fragile spreadsheets — and statutory maths done by hand
- A separate tool for hiring, another for reviews
- Leave tracked over WhatsApp and email
- No single source of truth for employee data
- Compliance risk every month

With NayaHR

- ✓ One platform, one login for the whole team
- ✓ Payroll with PF, ESI, PT & TDS built in
- ✓ Hiring → performance → pay, all connected
- ✓ Employees self-serve payslips, leave & goals
- ✓ An AI assistant that does the busywork

Everything your people operation needs

Core HR

A single, always-current record for every employee

Recruitment

Post roles, track candidates, hire straight into Core HR

Performance

Goals and reviews: employee → manager → HR

Compensation

Salary structures with full, dated change history

Payroll

India statutory payroll → payslips, done in minutes

Time off

Indian leave types, balances and approvals

Reporting

Headcount, cost and people insights at a glance

AI assistant

Ask in plain English — it does the work

India-ready payroll, built in

Run payroll for the whole company in minutes — the statutory maths is done for you, and every payslip is saved for your team.

✓ Provident Fund (PF)

✓ ESI

✓ Professional Tax

✓ TDS (income tax)

✓ Loss of Pay

✓ Employer cost

Finalized payslips are locked and saved — a clean record every month, no spreadsheets, no missed filings.

An AI assistant that gets work done

Not a chatbot — it performs real actions across the platform, for whoever's asking, within what their role allows.

● *"Run July payroll."*

● *"Create a requisition for a Senior Engineer in Bengaluru."*

● *"Raise a salary change for Priya, effective next month."*

● *"Who's on leave this week?"*

● *"Show me headcount by department."*

Why it matters

Less busywork.

Routine HR tasks happen in one sentence instead of ten clicks.

Safe by design.

The assistant can only do what the person asking is already allowed to do.

Your data is safe with NayaHR

Every company fully isolated

Your data is walled off at the database level — no other company can ever see it.

Bank-grade sign-in

Logins are handled by a specialist provider; we never store passwords. Google sign-in supported.

Invite-only by default

No one can access your workspace unless you invite them.

Every change is logged

A complete audit trail of who changed what, and when.

Role-based access

Owners, HR, managers and employees each see exactly what they should — nothing more.

Built with India's DPDP in mind

Designed around India's data-protection expectations from the ground up.

Built for how Indian businesses work

Statutory payroll

PF, ESI, PT and TDS calculated for you

Indian leave types

Earned, Casual, Sick, Maternity, LOP and more

Rupee-first

Everything in ₹, salary structures the Indian way

Approvals baked in

Manager and HR sign-offs where they belong

Effective-dated records

Full history — see the org as of any date

Up and running fast

Import your roster, invite your team — that's it

Bring your whole people operation into one place.

- ✓ Hiring, performance, pay & time off — one platform
- ✓ India-ready payroll, built in
- ✓ An AI assistant that does the busywork
- ✓ Secure, and live in days — not months
